

RampStar™ RFRD Refueler©

Built for Safety. Engineered for Performance.

The **RampStar™ RFRD Model** is a rear-engine, front-elevating service platform with a low-profile configuration—recognized globally as the most operator-friendly, large-capacity aircraft refueler on the market.

Trusted by **commercial airlines, freight carriers, and military airfields**, this model merges a time-tested chassis design with modern technologies to deliver the **longest-lasting, lowest-maintenance refueler in the industry**.

- ▶ **Available Capacities:** 6,000 | 7,000 | 10,000 | 15,000 gallons

Key Features of the RFRD Chassis

- ▶ GVWR range from **82,500 to 165,000 lbs**
- ▶ Purpose-built for airport ramp operations

Let's build your next
refueling solution.

Key Features of the RFRD Chassis

- ▶ **Speed-limited to 22 mph** for enhanced ramp safety
- ▶ **Aluminum in-line cabs** (1 or 2 person) with superior visibility and comfort
- ▶ **Industry's heaviest frame** with added reinforcements for long service life
- ▶ **Heavy-duty front and rear bumpers** for superior collision protection
- ▶ **Cummins Tier 4 Final Diesel Engines** for global on-site support
- ▶ **Allison Electronic Automatic Transmission**
- ▶ **Hydrostatic pump system** extends transmission lifespan
- ▶ **Closed-loop hydraulic system** improves efficiency and reduces oil use
- ▶ **Simplified maintenance with standardized components**
Designed for **easy access and low-cost repairs**

Add-On Options

Customize your RFRD unit with factory-installed features:

- + Cold weather protection (engine + hydraulics)
- + Factory-installed air conditioning
- + 70-gallon fuel tank upgrade
- + Custom configurations available upon request
